Closing

A few things…

- 82 registered participants, 52 presentation!
  - 34 phd students & 3 recently graduated
  - 13 MSc & 11 BSc students
  - 1 highschool student
- 14 institutes/universities from 10 locations from 6 countries!

- The is a remarkable next generation for young researchers!

IT NEXTGEN
Meeting
and Astrophysicists · FIKUT NEXTGEN
EVERYTHING HAPPENS FOR A REASON...
AND THAT REASON IS USUALLY PHYSICS.

FIKUTNEXTGEN
Welcome Everyone!

FIKUTNEXTGEN

Thank you!

- BORI! :) for beeing my partner in crime :D
- Local support from the nice Wigner guys & the secretary! Much appreciated! :)
  - They organized the coffee breaks and suggested the restaurant for dinner!
- Bálint for organizing the proceedings! :) (more info later) & Mina for her help to prepare your badges
- Gábor, András (Joe) & Robi for the Svábhegyi guide! It was pretty fun!
- For the financial support: CSFK CSI, Laca’s Élvonal, ATOMKI & Wigner for strudels & cones, and Maria Lugaro for the snacks!
- And all of the presenters & supervisors for the nice & high quality talks!

Proceedings

- in Astronomische Nachrichten
- deadline: 1st February
- Infos will be sent later

Now for the voting results! :)

- Thanks to the collegues for participating!
- We give prizes for the “best” 2 BSc, 2 MSc and 6 PhD presenters … and a special award, which goes to… :)

The best BSc talks:

- Dániel Estók for
  “Analysis of the Gaia Alerted eruptive young star candidate Gaia24bux”

- Veronika Napsugár Csillag
  “Examining the biological effects of UV-C radiation on Drosophila melanogaster in relation to exoplanet habitability around flaring stars”

The best PhD talks:

- Zsófia Bora for
  “High-velocity spectral features in thermonuclear supernovae”

- Viktória Fröhlich for
  “From the death of stars to the dawn of life: dynamical effects of mass loss around high-mass stars”

- Sándor Kovács for
  “Uncovering the importance of (p,n) reactions in the weak r-process”

- Erika Mochnács for
  “Pushing the Limits: Studying SN 2025zi and the Nature of Type Iax Supernovae”

- János Pető for
  “Hunting for lightning in protoplanetary disks”

The best PhD+ talk:

- Duncan V. Mifsud for
  “Radiation-Driven Sulphur Chemistry on the Surfaces of Jupiter's Galilean Moons: New Results from Laboratory Experiments”
